

9.0 FAQ:

Talent Card Refresh: When you take a face-up Talent card, when do you put out a new card? When a card is taken or removed from board it is immediately replaced with another from the top of the deck.

Advertising payment: Can Advertising be included as part of the movie's budget? Yes. If the movie is still in production (not flipped to release side), just attach the advertising like you would talent. Face the card so the advertising side is up, then place it under the movie. When the movie completes, the cost is part of the total and may still put it over budget. Pay the difference as normal. If you want to add advertising **Buzz** after a movie is completed, you pay the advertising cost as you play it. Most often you will do this with a movie that is currently released, but hasn't scored yet.

Matching Genre: Do you have to match genre when making and releasing movies? No. Anyone can go on any movie, and you can release any movie in any season. There are benefits to matching, though. Each matched Talent to Movie genre gets a bonus staff meeple. If your released Movie matches any Genre Preference on the current calendar season, you may ignore a "bad" critic review for *each* matching genre.

Bonus Meeples: If the Talent attached to a movie matches multiple genres with the movie, what meeples do I get? You may pick a meeple from the unemployed talent cafe for *each* matching genre.

Minimum Payout: What is the Minimum Payout at the bottom of the stat tracks? Any movie that fails to reach 2 **Artistry** or 2 **Buzz**, or if there aren't enough dice to distribute, that movie scores as if a  was rolled for it.
